

# Instructions For Installing Simple Webcomic

Now that you have downloaded an un-zipped the file, you are left with this manual PDF and the zipped Simple Webcomic File.

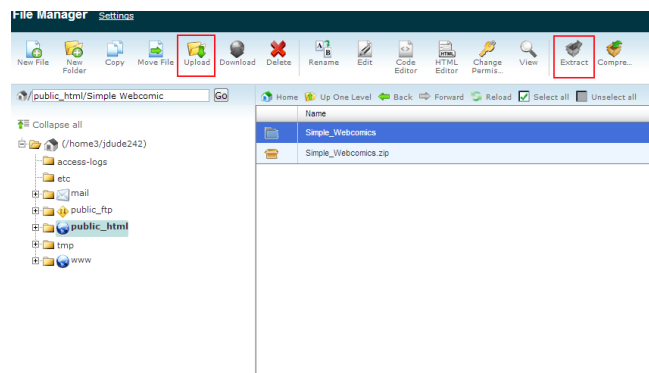

In the cPanel for your domain, go into the file management area.

At this point make sure you are in the public\_html directory.

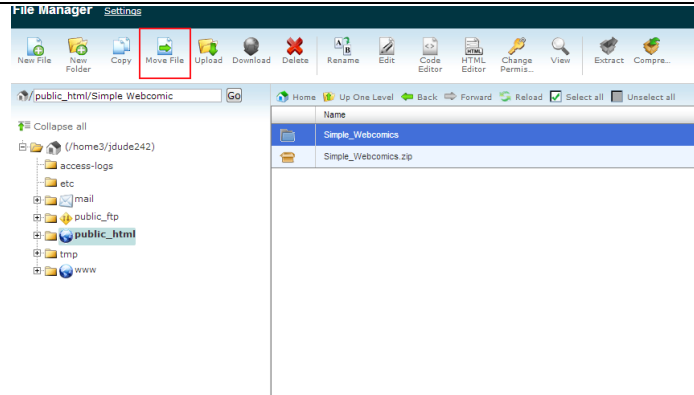

Upload the zip file and then use the tools on the page to unzip the file on the server.

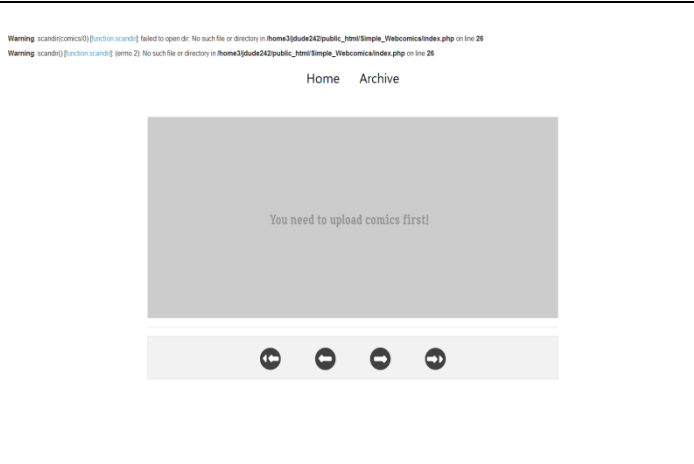

# Instructions For Installing Simple Webcomic

Move the files out of the Simple Webcomic directory and into the root directory of the server. This makes the site operational.

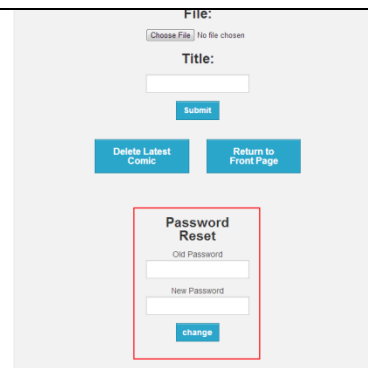

Now go onto your website. What you should see is an image telling you to upload comics. The error messages will disappear after a comic is uploaded.

Go to **yoursite.com/admin.php**, you should be asked for your password. The default password is **password**. Typing this in will give you access to the admin panel.

Now that you have accessed the admin panel, change your password to whatever you would like by typing the old password ('password') and the new password that you would like to have.

# Instructions For Installing Simple Webcomic

Now use your new password to access the admin panel, and now you're ready to start uploading comics!
